PROFILE SUMMARY

Frontend Developer specializing in React.js, JavaScript, and modern responsive web applications. Experienced in building scalable UI systems, interactive eCommerce platforms, and API-driven web applications with a focus on performance, accessibility, and clean architecture. Passionate about creating polished user experiences and developing production-ready frontend solutions using modern development practices.

WORK EXPERIENCE

InLighnX Global | Bengaluru

MAY 2025 - SEP 2025

Fontend Developer Intern

- Developed responsive and reusable React.js components for scalable web applications
- Integrated REST APIs and optimized frontend performance for smoother user experience
- Maintained clean and modular code architecture following industry standards

GoldenCare Buddy — AI-Powered Healthcare Assistant

- Developed an AI-powered healthcare support platform focused on elderly assistance and emergency support systems
- Designed a clean and accessible user experience for non-technical users and senior citizens
- Built interactive features for real-time assistance, emergency response guidance, and health-related support
- Focused on responsive design, smooth user interaction, and modern frontend architecture
- Improved usability and accessibility to ensure seamless experience across multiple devices

ResuNova — Precision Career Architect

- Built ResuNova, an AI interview prep platform using React 19, Node.js, MongoDB & Google Gemini 1.5 Flash that analyzes resumes against job descriptions
- AI engine generates match scores, 12-15 technical/behavioral questions with model answers, skill gap analysis & a 7-day study roadmap via Zod-validated structured output
- Designed glassmorphism dark-mode UI with 3-column dashboard, animated score ring, drag-drop PDF upload & Framer Motion animations
- Implemented JWT auth with httpOnly cookies, Multer file upload, PDF parsing & Puppeteer-based ATS-optimized resume generation
